Resurrect and embellish the project description and budget justification. Ann McNamara is going to send me some specifics on why CDC may have rejected that item the first time around with the ARRA grant.

This is correct. These are the last systems that need to be converted. What do you need me to follow up on this?

They asked what you were wanting to propose. I said LIMS components for virus serology and reference. Is that true? I guessed that it might cost ~\$49,000 since that was your quote for the ARRA grant, but you might need to revisit that.

*From the office of the
Executive Director*

(This message has been sent to all state public health laboratory directors and delegates, and ELC eligible local laboratory directors)

Dear State Public Health Laboratory Directors and delegates, and Selected local PHL Directors:

We want to make sure that you are aware of an upcoming informational session on the new ELC FOA that was recently announced. Please make sure that you coordinate internally as the CDC has limited ports. CDC asks that you connect with your ELC PI (if that hasn't already happened) for information regarding the call.

APHL will provide you with a guidance tool by Wednesday, August 11th.

+++++

To ELC Principal Investigators:

This email provides details on the ELC Affordable Care Act (ACA) FOA informational session scheduled for Monday, August 9th. Please note that attendees will need to dial into the teleconference for audio and access the web link for the slides. Following the informational session, ELC will distribute an FAQ to all grantees incorporating questions discussed in the informational session and other questions we have been receiving concerning the ELC ACA FOA. Looking forward to your participation.

Monday, August 9th

Time: 2:00pm to 3:30pm ET

Scott Becker
